

Industrial Lighting Overview

Efficiency, Safety, and Reliability.

GLI Brands

Current

Current

At Current, we know that the right lighting transforms industrial spaces. From manufacturing floors to warehouse aisles, and even hazardous environments, our solutions boost productivity, safety, and efficiency.

Our range of industrial lighting and control solutions is tailored to your needs.

Let us help you illuminate your workspace and discover how we can make a real difference in your industrial environment.

ProLine®

Contractor focused, in-stock, and readily available.
Same day shipping

QS10

Meet tight timelines with made-to-order
products shipped within 10 business days.

Warehouse

In the rapidly evolving industrial landscape, efficient, effective lighting in warehouses is crucial for boosting productivity, safety, and sustainability. Ensuring optimal lighting is key for uninterrupted operations.

Inadequate lighting systems not only raise safety hazards and energy costs but also lower operational efficiency. Modern logistics demand innovative lighting solutions to address these issues. Current's comprehensive selection of linear high bays meets all warehouse lighting needs, ensuring enhanced visibility and safety.

Current's high bay LED lights are a high-efficiency option, outperforming traditional lighting in quality.

PHB

A linear high bay that offers 120-347V, selectable lumen and CCT and a field-installable sensors as well as other accessories for maximum flexibility.

ProLine®

ABV

Specification High Bay offering market leading performance, reliability and flexible configurations with Daintree controls. The original compact highbay, optimizing total cost of ownership.

QS10

ALV

Quick and easy to install Linear Fixture that can be matched with Daintree motion, daylight, and wireless controls to increase energy savings.

PRC

NSF and IP65 rated high bay offering universal 120-347V, selectable lumens and CCT's, field installable sensors and accessories.

ProLine®

ABC

BAA/TAA certified Compact High Bay fixture with lumen packages up to 48,500 and Daintree controls.

QS10

Task

Distribution centers and warehouses demand exceptional visibility, particularly around corners and along aisles. When you factor in the swift movement of forklifts and the necessity for workers to easily read inventory labels, the importance of lighting that promotes safety and clarity becomes paramount for seamless and worry-free operations.

High bay LED lighting from Current offers a highly efficient solution, combining simplicity and functionality, and surpassing the performance of traditional HID and linear lighting products in terms of light quality.

PSF

Strip fixture with selectable lumens and CCT's, fast and easy mounting, and Daintree EZ connect controls accessory kits available.

ALC6

Efficient Linear fixture with Daintree control options for code compliance and additional energy savings.

ALV

Linear strip fixture that installs quickly with tool-less entry, plug-in continuous run links and can be matched with Daintree control for energy savings.

Hazardous & Demanding

Hazardous and Demanding Industrial applications inherently bring severe operating conditions, such as extreme temperatures, exposure to chemicals, and potential risk of explosions. Lighting solutions must be able to withstand these challenges while ensuring optimal visibility and safety for personnel.

Current's Hazardous and Demand light fixtures are specifically designed for these applications, and are more than capable of delivering reliable illumination, mitigating safety risks, and minimizing maintenance efforts and costs.

AHH

The Albeo® AHH2 LED luminaire is a Class I, Division 2, Groups A,B,C, and D rated fixture for hazardous locations with high ambient temperatures and wet applications. Utilizing a sealed, IP66-rated form factor, the Albeo AHH2 series offers customers a rugged design with exceptional performance and high reliability.

ABR

The Albeo® ABR offers customers a rugged design with exceptional performance and reliability. IP66-rated for demanding environments at high ambient temperatures and wireless Daintree controls enabled with motion sensor.

AH2

The Albeo® AH2 offers hazardous location lighting at high ambient temperatures. Ideal for new construction or can retrofit the Filtr-Gard™ H2 Hazardous Fixture.

AHG

The Albeo® AHG LED fixture is an enclosed & gasketed hazardous location LED product. AHG is standard Class 1, Division 2, Groups A, B, C & D.

Office & Administration

Save energy and boost productivity with LED office lighting from Current. Our versatile and energy-efficient solutions are perfect for any office space, enhancing both employee and customer well-being.

Our LED lights not only save energy but also add a modern, professional look to your workspace. Available in various styles and finishes, they match any interior design seamlessly. Advanced smart controls let you easily adjust brightness and color temperature. Features like automated scheduling and occupancy sensing optimize energy use even further.

LBP

Lensed troffer with selectable lumens and CCT's, recessed or surface mounting and wireless Daintree control options.

ProLine®

LVT

Recessed luminaire offering uniform light, excellent efficiency, reduced glare and Daintree controls

Corridors & Stairwell

Ensure your corridors and stairwells are safe and energy-efficient with Current's lighting solutions that provide excellent visibility, uniform illumination, and emergency capabilities—all while offering controllable options to meet your specific needs. Trust our expertise to deliver lighting that not only enhances safety but also optimizes energy consumption, ensuring your projects are both high-performing and cost-effective.

PSF

Strip fixture with selectable lumens and CCT's, fast and easy mounting, and Daintree EZ connect controls accessory kits available.

ProLine®

ALC6

Efficient Linear fixture with Daintree control options for code compliance and additional energy savings.

ALV3

Linear strip fixture that installs quickly with tool-less entry, plug-in continuous run links and can be matched with Daintree control for energy savings.

Cold Storage/Food Processing

Traditional lighting in this space often falls short because cold temperatures can make traditional lamps less effective as gases condense and connection points fail. LED lighting, however, thrives in the cold, running at lower temperatures and standing up to extreme conditions.

Lighting solutions that consider the entire cold storage area, from surfaces to air, can significantly boost your business, giving you an edge over the competition.

With Current LED solutions, you get safer food handling and more efficient lighting. Our versatile lamps and fixtures cut down on wasted energy, and our control options let you monitor the space effortlessly.

ABN

NSF rated High/Low bay fixture capable of 9,000-28,000 lumens with excellent color rendering and flexible control options with Daintree wireless sensors.

ALR

IP and NSF rated low bay fixture that can be matched with motion, daylight and wireless controls for increased energy savings.

PLR

NSF, Wet Location and IP 65 rated linear vapor tight offering selectable lumens and CCT's with a 120-347V driver.

ProLine®

PRC

NSF, IP65 and Wet rated high bay offering universal 120-347V, selectable lumens and CCT's, field-installable sensors and accessories.

ProLine®

Restrooms

Restroom lighting from Current ensures easy installation and maintenance, minimizing downtime and keeping your projects on schedule. With controllable settings and built-in emergency capabilities, our lights provide the reliability and flexibility you need to meet every client's expectations.

LBP

Lensed troffer with selectable lumens and CCT's, recessed or surface mounting and wireless Daintree control options.

ProLine®

LVT

Lensed troffer with selectable lumens and CCT's, recessed or surface mounting and wireless Daintree control options.

EVOLVE

Area/Site

With all the traffic from employee vehicles and delivery trucks, Current ensures your exterior and parking lot is well-lit to meet recommended light levels, enhancing safety and visibility during evening and overnight hours.

Our sign lighting offers a crisp, clean look that elevates your brand. For delivery trucks, well-lit docks are easier to find and navigate. For your employees and customers, an illuminated parking area reduces fender benders and minimizes theft risks.

Enhance efficiency even more with wireless lighting controls.

EALS

The EALS is ideal for commercial property site-lighting with various mounting options, up to 30,000 lumens and a robust design that allows flexibility.

EALP

The EALP offers a variety optical and lumen packages, with three color temperatures and multiple mounting options for ultimate application flexibility.

E2SD

The Evolve® E2SD LED Security Light is optimized for customers seeking a solution in outdoor work yards, roadside, suburban developments and rural areas.

ERLS

The Evolve® LED Roadway ERLS Setback Luminaire utilizes an advanced LED reflective optical system combined with multiple lighting distributions, mounting options and the ability to tilt. ERLS offers performance in a diverse set of applications ranging from interstates, roadways and parking lots.

Floodlighting

Current’s state-of-the-art flood lighting solutions enhance visibility and safety, creating a well-lit environment that reduces accidents and boosts productivity. With better lighting, workers can perform their tasks more efficiently, fostering a secure and effective workspace.

By choosing Current flood lighting, contractors can ensure their clients' facilities meet industry standards and are optimized for peak performance. Our advanced lighting technology offers improved visibility and safety, giving everyone peace of mind.

EFMH

The EFMH is a medium output line of Hazardous Rated flood lights offering world class performance and durability for industrial, indoor or outdoor applications.

EFHH

The EFHH is a high output line of Hazardous Rated flood lights offering world class performance and durability for industrial, indoor or outdoor applications.

EFH

The EFH offers world class performance and durability. Ideal for traditional flood solutions like building facade, billboard, warehouse docks and freight yards.

EFM

The EFM is our mid-lumen option for flood lighting built for durability. Ideal for general flood lighting and designed to replace up to a 400W HID fixture.

EFC

The EFC Compact Flood Light is a replacement for 50W to 150W HID general purpose flood luminaires offering significant energy savings with a long-life LED light source.

DAINTREE WIRELESS LIGHTING CONTROLS SOLUTIONS

Simple, Scalable, Flexible

The Daintree® wireless hardware platform can be deployed easily as a standalone system for zonal controls in EZ Connect mode, or as a more complex networked system using the web-based, cloud-hosted Daintree® Controls Software (DCS). This software enables you to control and monitor facilities at multiple sites and integrate IoT solutions tailored to your business needs.

Schedule lighting easily

Utilize Site Manager to control and schedule lighting across the facility, from one location.

Simple multi-site scheduling

Use the DCS Global Scheduling feature to manage and schedule lighting throughout a facility or multiple sites from a single location.

Real-time actionable data and analytics

Heatmaps, graphics, and animated reports on energy usage, space occupancy, space temperature, and light levels facilitate system adjustments for optimal energy efficiency and user comfort. They also enable informed decision-making regarding lighting strategies

Enhance employee productivity

Utilize data from DCS reports to make strategic decisions for your facility, such as scheduling lights, adjusting light levels, and updating temperature setpoints, to enhance your employees' experience.

Alerts and Notifications

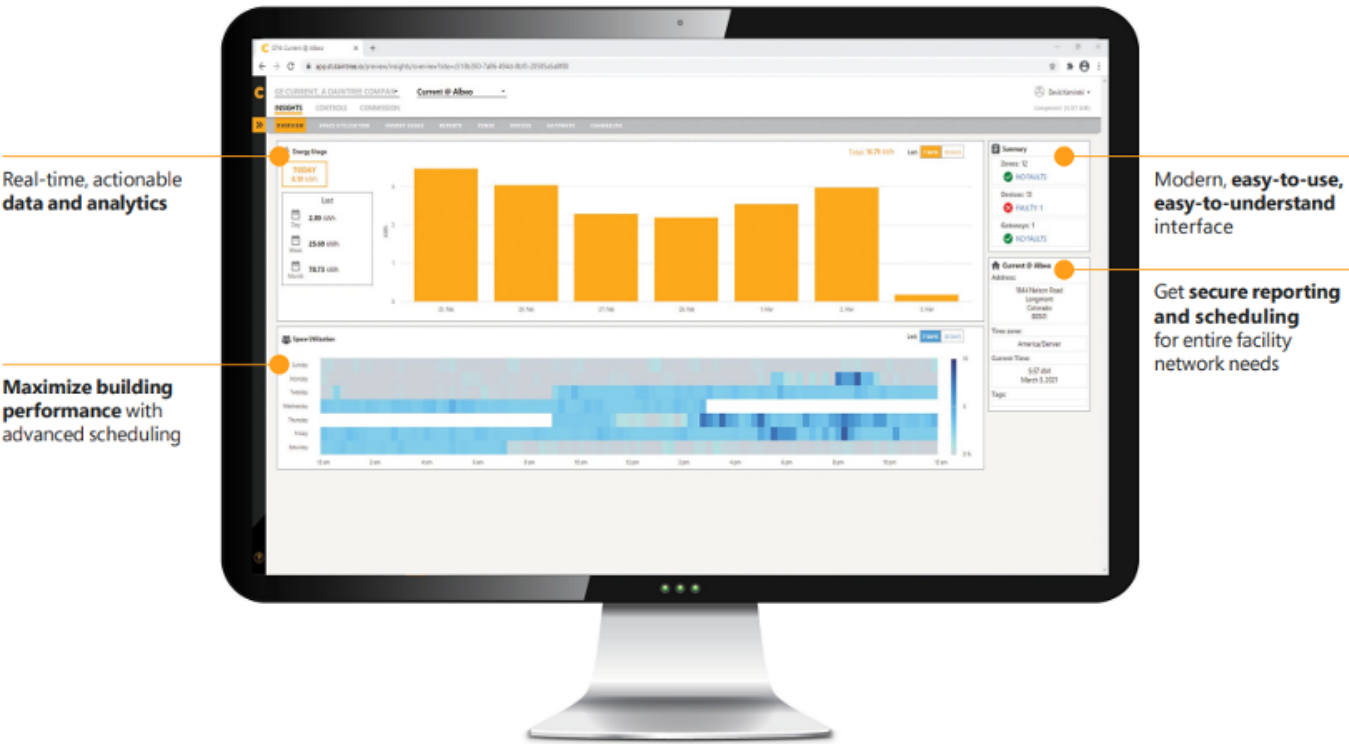

DCS enables the definition of custom alerts for one or multiple sites. Maintenance teams can subscribe to specific alert types based on their designated facilities and areas of expertise, enhancing system troubleshooting and maintenance.

Save energy

Reducing energy costs is a key aspect of any facility management plan. The energy report provides essential data that empowers smarter strategic choices, significantly enhancing overall efficiency.

Provide an infrastructure of IoT

Daintree® Networked uses DCS as its software backbone and goes beyond lighting solutions. It can connect with various building systems, such as HVAC, fans, and water heaters, through BACnet and public API. This integration creates a comprehensive Internet of Things (IoT) solution that enhances building automation and energy efficiency.

What is Daintree® Controls Software?

- DCS is easy to set up and provides a flexible solution for managing your facility portfolio effectively and efficiently.
- You can scale up to integrate with building management systems using BACnet protocols.
- Meet your current and future smart building needs with an enterprise-level web API.
- Centralized scheduling and monitoring to ensure uniform performance across all your facilities in the region or network.

Always On.

At Current®, we're inspired by the people who design, craft, live, work & play in spaces. Our award-winning family of brands is dedicated to offering bold integrated solutions, while providing the essential tools for designing connected lighting environments, both indoors and out.

Only Current can provide reliable performance, responsive service, and the uncompromising quality you expect from an industry leader every time, always.

Our Vertical Markets

Commercial
Stores, Offices, Hotels, Supermarkets, Restaurants, Healthcare, Education

Industrial
Manufacturing Centers, Warehouses, Food Processing Plants

Municipal
Roadways, Residential Streets, Shared Spaces

Specialty
Signage, Transportation, Rail, Refrigerated Display Lighting

Our Solutions

LED Lighting
Optimize utilities to end excess energy spending, promote safety and improve aesthetics

Controls, Sensors & IoT Solutions
Improve space utilization and increase productivity, and find actionable insights with IOT

Energy Management Systems
Establish more sustainable energy practices across an enterprise

Current

Industry-leading portfolio of innovative product and tech brands.

Current's GLI Brands portfolio of products represents a collection of lighting and control's most respected commercial brands, ranging from indoor to industrial, outdoor to roadway, specialty, signage, and more.

The GLI Brands portfolio is built upon storied innovation, quality and reliability - a complete package ready to fulfill the needs of any commercial project.
