

## CONCRETE BOLLARD

Kim's concrete bollards are built to last. The concrete is reinforced with a steel wire mesh cage. In addition, the anchor bolts for the base and head are welded to the cage. All to create a very durable, strong and reliable bollard.

The concrete is offered in in four colors: white, natural gray, charcoal and brown. Each tailored to fit a broad range of applications.

Due to our continued efforts to improve our products, product specifications are subject to change without notice.
