

LITEISTRY™

LITEISTRY™

CREATIVE SOLUTIONS through the Power of CONSISTENCY

Create spaces with the confidence that **LITEISTRY™** will complement your vision through consistent:

APERTURE APPEARANCE

QUIET CEILING DESIGN

OPTICAL PERFORMANCE

CONSISTENCY

in Aperture Appearance

LITEISTRY™ delivers a unified family appearance across all aperture sizes and shapes.

APERTURE SIZES SHOWN TRUE TO SIZE

CONSISTENCY

through Quiet Ceiling Design

Through common optical construction and consistent materials, **LITEISTRY™** delivers 50° visual cutoff to source and source image to maintain the focus on the space - not the ceiling.

Common LED source and mounting methodology

Varied upper reflector for different distributions

Optical film for beam modification

Optical grade silicone cover lens delivers beam uniformity and smooth edge transitions

Consistent aluminum reflectors across all aperture sizes and shapes

Consistent anodized reflector finishes

THE ARCHITECTURAL SPACE AS THE FOCUS

The demand for more LED luminaire options led to solutions that emphasize delivered lumens over light control. Luminaires, including downlights, with the source positioned at or near the ceiling plane have become common. Shallow regressed downlights, which draw attention to the ceiling and away from the overall space, have become acceptable for illuminating architectural environments. Glare is now something to be tolerated or even expected.

IT'S TIME TO EXPECT MORE.

LITEISTRY™ eliminates the need to compromise. Continued improvements in LED efficacy, materials and optical design created the opportunity for high performance – high quality architectural downlighting. LITEISTRY delivers truly quiet ceilings with 50° cutoff to the light source and source image while offering a greater range of lumen outputs and uniform beam patterns. Glare has been eliminated, returning the focus to the architectural space – not the ceiling.

LITEISTRY with 50° cutoff for a quiet ceiling

Alternative shallow aperture solutions create greater ceiling glare

LITEISTRY™ is available in Open or Lensed Wall Wash solutions that provide uniform beam patterns with soft edges across all aperture sizes. While providing vertical illumination on wall surfaces, Open Wall Wash luminaires (available for round aperture) also contribute to the ambient illumination - complementing other downlighting in the space. Lensed Wall Wash luminaires direct the light higher on the wall and provide less general illumination.

CONSISTENT BEAM OPTIONS BETWEEN CYLINDERS AND DOWNLIGHTS

*For overview purposes only. Not all options are available in combination. For complete ordering information, see specification sheets.

FOUR CYLINDER MOUNTING OPTIONS

HOUSING OPTIONS

NON-IC PLASTER FRAME

(-H) New Construction plaster frame housing for Non-IC applications

IC RATED

(-H IC) New Construction enclosed housing suitable for use in insulated ceiling (IC) applications

CHICAGO PLENUM

(-H CP) New Construction enclosed housing CCEA approved for use in Chicago Plenum applications

INSTALL FROM BELOW

AVAILABLE IN 3" ROUND AND SQUARE

(-RH) New construction/remodel housing intended for Non-IC installation from below ceiling after drywall

RETROFIT

AVAILABLE IN 4" & 6" ROUND

(-RFH) Retrofit housing intended for Non-IC installation from below ceiling without the removal of the existing fixture plaster frame

EMERGENCY OPTIONS

LITEISTRY™ offers integral and remote UL924 emergency lighting options as well as auxiliary power solutions to ensure safe egress and compliance with life safety codes.

EM

INTEGRAL EMERGENCY

Battery pack and test switch with indicator light integrally mounted to plaster frame.

EMR

REMOTE EMERGENCY

Battery pack mounts to plaster frame. Remote test switch plate/ indicator light assembly can mount up to 50 ft away.

DTS

DEVICE TRANSFER SWITCH

Control relay device mounts to plaster frame J-box and connects to auxiliary generator or inverter. Senses loss of normal power and bypasses switch position and dimmer settings to provide full lumen output under emergency power. DTS Listed to UL1008 Transfer Switch Standard.

Integral EM option comes with test switch mounted to the plaster frame, not the reflector, facilitating fast, easy installation. Available in apertures as small as four inches.

ACCESSORIES

LPS SERIES
MICRO-INVERTER
20VA/55VA

Use with multiple standard **LITEISTRY** fixtures from 20W through 55W loads

LITEGEAR®
CENTRAL INVERTERS
125VA/250VA

Ideal for larger applications and loads from 110W through 220W

Contact your local Current representative for any assistance with proper sizing and loading of your inverter selection.

UL 924 COMPLIANT

All emergency housing options and accessories provide path of egress lighting for a minimum of 90 minutes:

EM/EMR BATTERY PACKS

Provide 7-watts of emergency power and are CEC Title 20 compliant

DTS OPTION & INVERTERS

Provide full output emergency AC power

FINISH OPTIONS

LITEISTRY™ offers a wide variety of finish options that allow fine-tuning of the ceiling aesthetics.

SPECULAR (S)
Specular is a mirror-like finish that creates a low brightness, glare-free appearance with its precise cutoff.

SEMI-SPECULAR (SS)
Semi-Specular exhibits a slightly diffuse look in the ceiling plane while still maintaining a glare-free appearance.

AMERICAN MATTE™ (MFC)
Prescolite's patented American Matte™ (U.S. Patent No. 6,254,256) finish has a stippled surface texture that provides a softer cutoff with dynamic brightness that helps hide fingerprints.

SOFTSHEEN™ (VSS)
SoftSheen™ falls in between the Specular and Softglow® finishes. It offers a deeper finish than Semi-Specular with a slightly brighter ceiling appearance.

SOFTGLOW® (VS)
Softglow® reflectors raise the ceiling plane visually by creating controlled brightness without glare at the aperture. It is an excellent alternative to a white painted reflector finish.

CONSISTENT ANODIZED SOLUTIONS

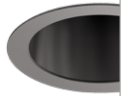

LITEISTRY utilizes anodized aluminum reflector trims across all aperture sizes and shapes. Anodized aluminum allows improved optical control and reduced aperture brightness – both key elements for a quiet ceiling. The anodizing process forms a layer of aluminum oxide that creates a finished surface offering greater corrosion and abrasion resistance than the base aluminum material. The hardened surface can easily be wiped down with commonly found cleaning solutions.

Anodizing also allows choices in surface finish and color that create additional options for light distribution and aperture appearance. Due to its resistance to fading and scratching, the aperture appearance will remain unchanged over time with normal maintenance.

FLANGE/COLOR OPTIONS

COLOR OPTIONS

LITEISTRY™ offers an array of anodized and painted cone colors that, with the finish options, will enhance the tone and color within the space.

	Clear (Standard)		Pewter (PW)
	Champagne Gold (CG)		Painted White (WC)
	Black (BL)		Painted Black (BC)
	Light Wheat (LW)		

FLANGE OPTIONS

Varied flange options allow choices for how the reflector trim will integrate with the ceiling surface.

	Matches Reflector
	Painted White (WT)
	Painted Black (BT)
	Flush Mount (FM)

CYLINDER COLOR OPTIONS

				
Brushed Aluminum	Bronze	Matte Black	Matte White	Silver

LITEISTRY Cylinders are available in five standard finishes: Brushed Aluminum (BA), Bronze (BZ), Matte Black (BL), Matte White (WH) and Silver (SVR). Custom colors also available.

FLUSH MOUNT FLANGE

The Flush Mount Flange (FM) option minimizes the appearance of the flange at the ceiling. The mud-in ring (sized to match the luminaire aperture) can be concealed with joint compound, sanded and painted to match the ceiling. Once the reflector trim is installed, a near seamless flush flange appearance is achieved.

COLOR TUNING

SPECTRASYNCTM COLOR TUNING TECHNOLOGY

SpectraSync™ is an easy and intuitive white tuning solution offered in two modes to accommodate a variety of applications. **LITEISTRY™** provides lighting professionals with the tools needed to implement human-centric strategies that promote wellness and balance.

DIM TO WARM

Dim to Warm mimics the familiar warming effect that occurs with traditional incandescent sources as they are dimmed. (Available with 2200K-3000K)

- Create a soothing, calm atmosphere
- Ideal for hospitality, retail, long-term healthcare and residential spaces

TUNABLE WHITE

Tunable White offers users the ability to tailor CCT to their personal preference, enhancing task visibility, material and colors or the aesthetics of the space. (Available with 2700K-5000K or 2700K-6500K)

- Preset CCT or schedule changes through the day to emulate the rhythm of nature
- Promote a sense of well being in office, classroom and healthcare environments

2700K 3500K 4500K 5500K 6500K

CONTROLS OPTIONS

NX LIGHTING CONTROLS

LITEISTRY™ NX wired or wireless luminaire-integrated control options allow easy connection to other intelligent devices within NX Lighting Controls platform for nearly unlimited lighting control possibilities.

DIMMING OPTIONS

LITEISTRY offers a wide variety protocol options for smooth, continuous dimming and hassle-free system compatibility.

DIMMING PROTOCOL	DIMMING OPTION	DIMMING LEVEL
0-10V	DM1	1%
	DM01	<1%
Lutron HiLume ECOSYSTEM	EDM	1%
