# Obsidian

The Obsidian Message Sign provides a reliable method to highlight critical messaging. The high contrast face panel clearly communicates the message in visible red or green letters when the sign is energized. In the Off condition, the face becomes black without any message bleed through—eliminating any confusion. A variety of standard message panels are available with custom messages available upon request.

## Features

- The message remains invisible until the sign is energized—enhancing communication of the intended warning.
- The LED panel is designed to provide bright and uniform illumination across the panel face.
- A variety of standard messages can be selected with either red or green letters. Custom messages are available upon request.
- Extruded aluminum body with die cast corners available in either a white or black finish.
- Obsidian is provided ready for surface-, ceiling-, end- or wall-mounting with included canopy accessory. Recessed mounting available with optional mounting kit.
- LED life-cycle exceeding 10 years.

## Dimensions

	Power Consumption			
	Red Panel		Green Panel	
	120VAC	277VAC	120VAC	277VAC
<b>Hz.</b>	60	60	60	60
<b>Amps</b>	0.163	0.091	0.17	0.097
<b>Watts</b>	11	11	12	12.33
