

Current LED Fixtures with Daintree® Integrated Controls

Superior savings and performance are built-in.

Lumination® LVR Retrofit Luminaires

Reduce energy, maintenance and installation costs while improving quality and output of light.

Lumination® LVR Retrofit Luminaires from Current are ideal for commercial office, education or healthcare applications. Get high uniformity, excellent efficiency and reduced glare *plus newly rerated lumen maintenance of greater than L85 at 50,000 hours* and high performance options with DLC premium.

Integrated Daintree EZ Connect Controls* are already enabled (*order cat logic TT)

Volumetric Refit Door Kit provides uniform light distribution

Easy to install and commission with Daintree EZ Connect App

Available in 2x2 or 2x4 models

Maintenance-free Self-Powered Wireless Rocker Switch does not require batteries

Perfect for indoor retrofit where previous fixture "box" remains in place; no need to go above the ceiling

Integrated Controls make installation *fast* and *simple*

Easy & quick
installation

No major
rewiring

Installs **below** the
ceiling plenum

Easy commissioning
with the app

No **additional** holes
in the ceiling

No **batteries**
to replace

The Lumination® LVR has a modern three-dimensional look with curved or rectangular diffused lens, matte finish and delineated details that create visual interest in any ceiling. No unsightly ribs impede performance—this smooth, uniform light is free of pixels or stripes. No dark end caps or unsightly sensors interrupt the visual flow across the ceiling landscape.

Available with Daintree’s complete portfolio of wireless control options, these advanced fixtures install easily and quickly—the control elements are already in the fixture—for efficient IECC, ASHRAE 90.1 or Title 24 Energy Code Compliance. The Daintree EZ Connect app makes commissioning and zoning a breeze. Plus, the sensor is wired to the fixture and the Wireless Rocker Switch is self-powered, so there is no maintenance or battery replacement needed.
