

Product Codes 93013528, 93013522, 93013523, 93013524 (Tetra[®] PowerGrid Series - Gen 3)

BEFORE YOU BEGIN

Read these instructions completely and carefully.

4

WARNING/AVERTISSEMENT

RISK OF ELECTRIC SHOCK

RISQUES DE DÉCHARGES ÉLECTRIQUES

- Disconnect power before servicing or installing product.
- RISQUES DE DECHARGES ELECTRIQUES
- Couper l'alimentation avant le dépannage ou avant l'installation du produit.

Save These Instructions

Use only in the manner intended by the manufacturer. If you have any questions, contact the manufacturer.

LED System Features

- Certified to UL 2108
- Low-Voltage Luminaire (24 VDC)
- IP54, dry or damp location rated.
- Compatible with 24 Volt LED Drivers
- Dimmable with Current 0-10V Dimming LED Driver or Current Dimming Module and compatible dimming controller

For use in the following applications

- Backlighting
- Illuminated Walls or Ceilings

Prepare Electrical Wiring

*Electrical Requirements*Do not use in wet locations.

Grounding Instructions

- The grounding and bonding of the LED Driver shall be done in accordance with National Electric Code (NEC) Article 600.
- Follow all National Electric Codes (NEC) and local codes.

LED.com

Determine Layout

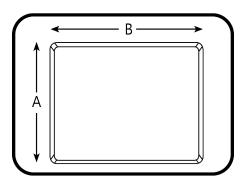

Determine total number of modules needed to populate the application area based on width and height. Refer to estimating charts below.

NOTE:

1

For optimal light uniformity, application depth should be a minimum of 3 inches (76 mm). A mock-up using the PowerGrid module and panel to be illuminated is highly recommended.

Total number of modules required based on height and width:

Horizontal width in **FEET** (B)

2

Using the diagram below as an estimation guide, begin cutting strings of modules to create 8-inch (203 mm) tall rows and 12-inch (305 mm) wide columns.

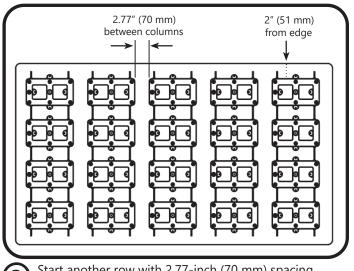

Modules should be 2 inches (51 mm) from the edge of the application with 2.77 inches (70 mm) between each column.

Install Modules

Fasten down each module with at least one screw in the center hole or two opposing sides.

Start another row with 2.77-inch (70 mm) spacing between the module strings.

Continue this process until the entire application is populated with modules

Current

Electrical Connections

Strip the ends of the wire 1/2-inch (13 mm) on the modules (white and red) of adjacent columns that you want to connect.

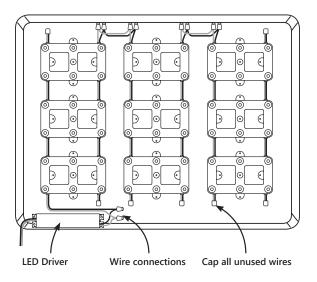

Use UL approved wire connectors (twist-on or in-line connectors) and 18 AWG (0.82 mm²) wire to connect the corresponding wires.

Strip the end of the wire 1/2-inch (13 mm) on the first column of modules and connect to the output of the LED Driver. Output connections must be red-to-red and white-to-black.

Refer to the LED Driver Installation Instructions for more information on connecting the LED Driver.

Troubleshooting

Symptom	Solution
Row of modules does not light	 Check wire connections to LED Driver to ensure red-to-red and white-to-white connections Check row-to-row polarity connections.
All modules do not light	 Check input voltage and check LED Driver input/output connections.
Individual modules do not light	 Check wire connection attachment and polarity of wires.
Modules are dim	 Ensure the overall length of modules does not exceed the maximum load for the LED Driver. Ensure the length of the supply wire is equal to or below the recommended remote mounting distance (see remote mounting distance chart above).

Loading Chart

LED Driver	Minimum Loading	Maximum Loading					
79045 (GE080/MV/D24T1-A)	1 Module	30 Modules/20 ft. (6.1m)					
67825 (GEPS24-100UGL-IP)	1 Module	36 Modules/24 ft. (7.3m)					
62189 (GE180/MV/V24T1-C) 1 Module		33 Modules/22 ft. (6.7m) per Bank; 66 Modules/44 ft. (13.4m) per Driver					

Remote Mounting Distance

LED Driver	18 AWG (0.82mm²) Supply Wire	16 AWG (1.31mm²) Supply Wire	14 AWG (2.08mm ²) Supply Wire	12 AWG (3.31mm ²) Supply Wire		
79045 (GE080/MV/D24T1-A)						
67825 (GEPS24-100UGL-IP)	1-30 ft. (0.3-9.1m)	1-50 ft. (0.3-15.2m)	1-80 ft. (0.3-24.4m)	1-120 ft. (0.3-36.6m)		
62189 (GE180/MV/V24T1-C)						

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This Class [A] RFLD complies with the Canadian standard ICES-003. Ce DEFR de la classe [A] est conforme á la NMB-003 du Canada.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
