

NOTE: Components shown in images are representative only and may vary based on the configuration ordered.

CAUTION! — READ THIS FIRST — IMPORTANT SAFETY INSTRUCTIONS

- Carefully read the instructions pertaining to your fixture. If you have any questions regarding the proper installation or local codes, consult a qualified electrician.
- To avoid shock hazard, do not work with live electrical wires.
- Install and wire the fixture in locations in compliance with the National Electric Code and any local codes.

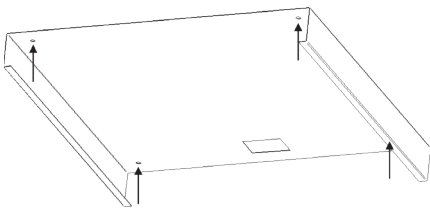

WARNING: This product must be installed in accordance with the applicable installation code by a person familiar with the constructions and operation of the product and the hazards involved.

WARNING: Risk of fire, minimum of 90°C supply conductor. Consult a qualified electrician to ensure correct branch circuit conductor.

WARNING: To avoid shock hazard, disconnect the power at the panel board (circuit breaker box) before beginning installation.

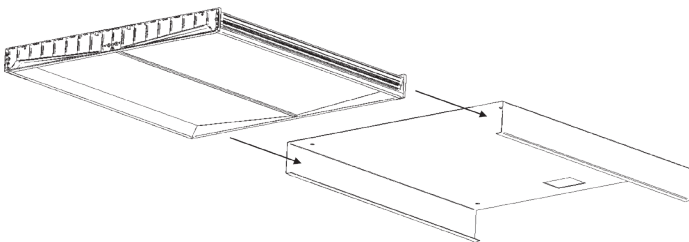

STEP 1

Mount the one-piece backplate to the hard ceiling using fasteners supplied by others. Ensure that it is tight to the ceiling.

STEP 2

Slide the fixture into the backplate so that the cutout on the surface mount frame aligns with the electrical feed point on the fixture.

STEP 3

Make electrical connections.

STEP 4

Insert the endcaps into the backplate. The top and sides of each endcap should fit tightly inside the profile of the backplate. The bottom flange on the end caps should be below the bottom flange of the backplate.
