# Liteforms® Collection

DUAL LITE
LE Series Edge-Lit
LED Exit Signs

Model URK
Universal Rough-In Kit
Installation Instructions

ROUGH-IN

1. Attach mounting bars to universal rough-in back box (if required) using #8 sheet metal screws supplied.
   For side mount bar applications, use six screws (three per side). See **Fig. A.**
   For end mount bar applications use four screws (two per end). See **Fig. B.**

2. Install back box as shown in **Figures A, B** or **C**.
   CAUTION: On all ceiling grid applications, use locking clips (supplied) to secure rough-in box to T-bars. See **Fig. A**
   NOTE: It is recommended that locking clips be attached to mounting bars prior to installing bar sets on rough-in box.

3. Adjust internal trim ring flush with wall or ceiling surface and tighten four retaining screws. See **Fig. D**

4. Attach electrical cable to back box using approved connectors (supplied by installer) and make electrical connections to transformer as shown in **Fig. E** using wire nuts or other approved fasteners.

SUSPENDED CEILING GRID INSTALLATION USING SIDE MOUNTED BARS

IMPORTANT:
Secure box to T-bars using locking clips and #8 machine screws provided.

Fig. A

INSTALLATION USING BARS END MOUNTED

**Fig. B**
