

## TriGain<sup>®</sup> technology

### **What is TriGain<sup>®</sup>?**

TriGain<sup>®</sup> is a patented narrow-band potassium fluorosilicate (PFS) phosphor technology which provides improved color rendition without compromise to LED efficacy.

### **What are the benefits of TriGain<sup>®</sup>?**

TriGain<sup>®</sup> delivers 90 CRI (50+ R9) color rendition with 80 CRI LD efficacy.

### **What LED color temperatures utilize TriGain<sup>®</sup>?**

TriGain<sup>®</sup> is compatible with all CCTs, including SpectraSync.

### **Do all Current products utilize TriGain<sup>®</sup>?**

The Current portfolio is actively transitioning to TriGain<sup>®</sup> technology. Please see each brand/product for availability.
