UPS inverter system

Stay Safe, Stay Powered: UPS Solutions for Critical Elevator Operations

- 1 Code-Compliant Safety**
High-rise buildings must provide at least 90 minutes of full-load backup power for elevators to meet safety regulations during utility outages.
- 2 Cleaner, Smarter Backup**
UPS systems are replacing standby generators due to stricter air quality regulations and lower maintenance demands.
- 3 Reliable Performance**
Made from industrial grade components the system is seismic rated for all zones with seismic bracket options.
- 4 System Protection**
Regulate voltage and frequency to protect sensitive elevator electronics from damage during power transitions.
- 5 Versatile Functionality**
Compatible for elevators with or without Regenerative power.

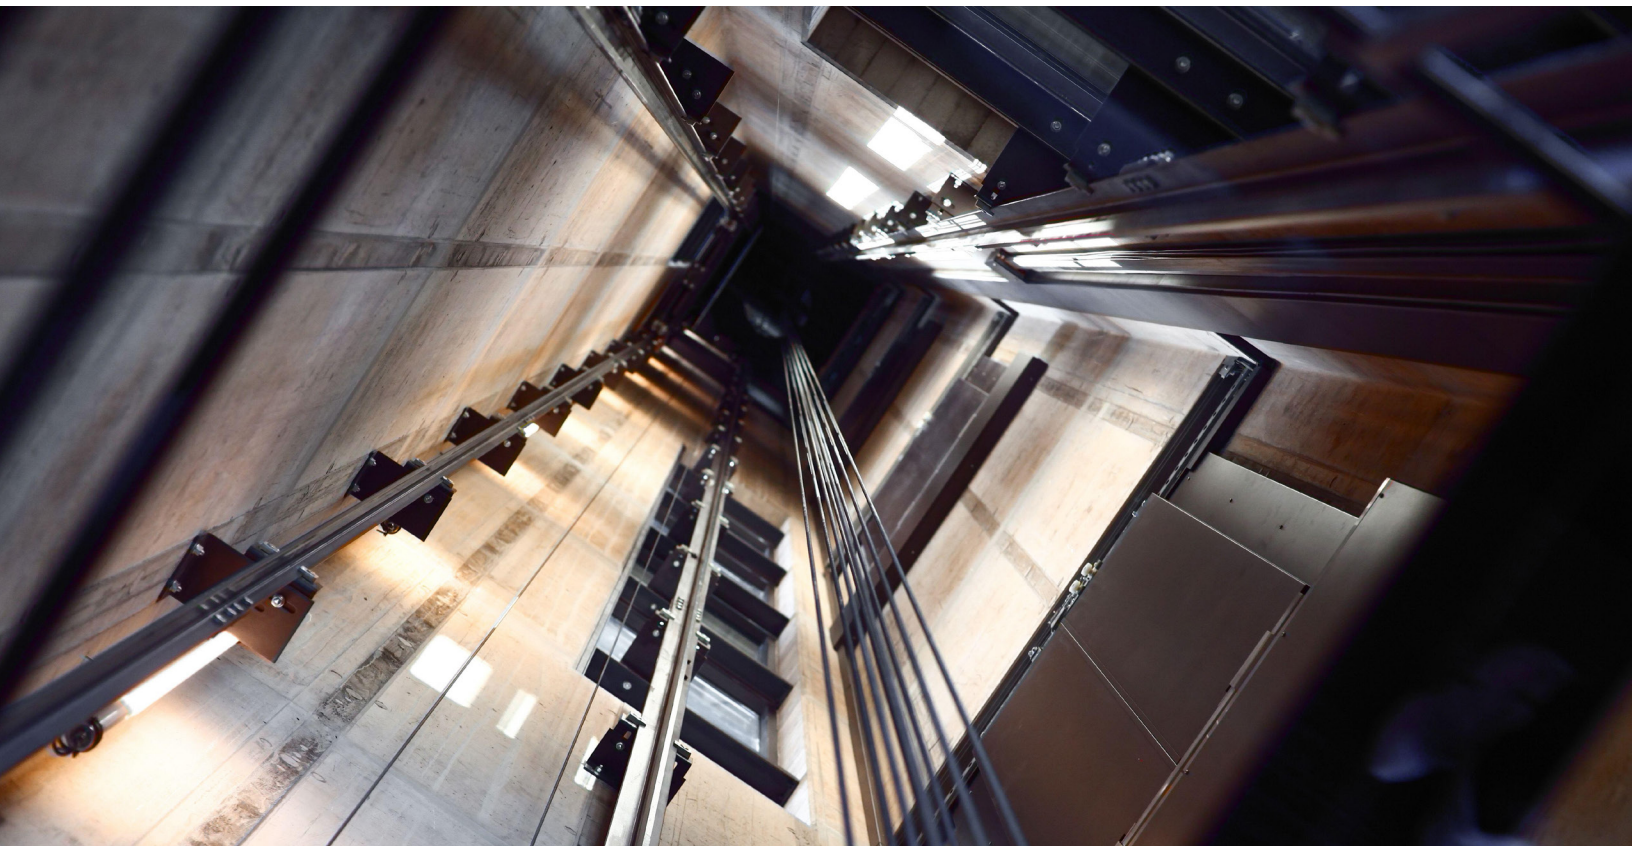

Overview

Keep Moving

In the event of a power outage, Dual-Lite's UPS system automatically transfers to battery power, keeping elevators running without interruption for 90 minutes or more.

The system seamlessly recharges once utility power is restored—ensuring continuous readiness for the next emergency.
