FEATURES

- Field Switchable lumen and CCT technologies maximize inventory versatility and flexibility.
- Two switchable lumen packages with Size 1 ranging between 16,000 to 22,000 and Size 2 ranging from 27,000 to 36,000 lumens. Switch is initially set to the maximum lumen level.
- Field switchable CCT can be either 3500K, 4000K or 5000K with both CCT's delivering 80 CRI. Switch is initially set to 4000K CCT.
- A universal voltage (120-347V) driver with 0-10V dimming to 10% provides great light output control.
- A versatile medium lens with optional wide and narrow distributions, giving you precise control to match any lighting requirement.
- A field installed PIR sensor can be quickly installed. The highly featured sensor provides occupancy control. With the use of the sensor remote, daylighting and dimming capabilities can be enabled and the default settings can be customized.
- Integrated sensor options for code compliance, grouping of fixtures, increased energy savings, and connection to NX Lighting Controls systems.
- Excellent thermal management in a compact fixture provides a wide ambient temperature application range: -40°C to +50°C.
