

FEATURES

- Variable Intensity technology provides a range of specifiable outputs and resulting fixture wattages
- 1150 lumens max. See performance data table for additional information.

Cross Section
Recessed Drywall

SPECIFICATIONS

Due to the complexity of this specification, submittal drawings for any configuration are required. Some configurations may require remote mounting drivers.

CONSTRUCTION

- 4.5" x 3.8" profile with 1.9" aperture (nominal).
- Extruded aluminum housing with machined aluminum end headers
- Machined aluminum end caps mechanically attached with no exposed fasteners

OPTICS

- 3 SDCM CCT consistency, 80 CRI.
- White Opal (WOL) diffuse acrylic downlight diffuser

ELECTRICAL

- Variable Intensity (VI) technology allows precise specification of fixture output/wattage. Fixture will be programmed and labeled to specification.
- LED boards and solid state constant current driver are field-servicable.
- LED rated life L85 > 50,000 hours. Tested in accordance to LM79-2008 & rated life derived from EPA TM-21 calculator.
- 1C (1 Circuit) Fixture wired for a single circuit

ELECTRICAL (CONTINUED)

- 10W battery powered driver. Provides a minimum of 90 minutes of emergency lighting. Available in straight fixtures greater than 3' in length.
- Inverter-Compatible. Provided by others.
- Operating Temperature: -20 to 25°C

INSTALLATION

- Integral side rails allow installation into drywall slot. Visible flange is located on all 4 sides of fixture.

CERTIFICATIONS

- ETL listed for damp locations
- IC Rated
- IBEW
- AF of LThis product meets federal procurement law requirements under the Buy American Act (FAR 52.225-9) and Trade Agreements Act (FAR 52.225-11). See [Buy America\(n\) Solutions](#).
- Emergency Battery Backup options are California Energy Commission (CEC) Title 20 Compliant.

	Weight
88L-R-4	4 lbs/ft

WARRANTY

- LED boards - 5 years
- LED drivers (standard) - 5 years

PERFORMANCE DATA TABLE

The table below shows the delivered lumens for the various lumen outputs. Use this chart in connection with the output multiplier capability to deliver any output required

Table with 4 columns: Distribution/Output, Lumens/Ft, W/Ft, Efficacy. Rows include D035 through D115 with corresponding values for lumens, watts, and efficacy.

(Wattage may vary up to 5% from published)

Output Multiplier Table

Photometrics and outputs published on this spec sheet are based on nominal 3500K temperature. This table may be used to approximate the lumen values at different Kelvin temperatures. Power consumption would stay the same.

Table with 2 columns: CCT, 80 CRI. Rows show CCT values of 3000K, 3500K, and 4000K with their respective CRI values.
