PVT Series

2x2 & 2x4 Volumetric T-Grid

The Lumination® PVT series is a three-dimensional volumetric designed luminaire designed for those with first cost needs. For total cost of ownership requirements consider our LVT Series. PVT offers even lower installation costs with switchable lumens and CCT, so there is no need to decide the specific product until it is at the job-site. Suitable for indoor general lighting on both new construction and retrofit solutions.

DAINTREE CONTROLS

Daintree® Wireless Controls:

There is no one size fits all for wireless controls. Some networks want simple solutions that reduce energy consumption and meet code compliance while others are more ambitious, looking to capitalize on the LED and controls savings to fund a scalable, enterprise-grade, internet of things solution. The advantage of the Daintree® Wireless platform is its ability to integrate into indoor, outdoor and high bay environments. The Daintree® Wireless Controls provide the infrastructure to future proof your buildings, easily upgrade to Networked solutions and provide the ability to integrate into IoT solutions that are right for your business.

- **Daintree® One:** Standalone Wireless Controls
- **Daintree® EZ Connect:** Room-Based Wireless Lighting Controls
- **Daintree® Networked:** Networked Lighting Controls for Smart Building & IoT Enablement.

Note: For networked solutions, use the LVT/LVR series products.

Daintree® Wireless Controls are already integrated in your favorite Current LED fixtures. Integrating the controls into the fixture cuts labor costs considerably since the sensors are already embedded in the lighting fixtures. There's no need to get above the ceiling plenum and install additional devices. Visit our website LED.com for a complete list of LED Fixtures.

DLC5.1 LLLC:

Integrated/embedded networked lighting control, luminaire-level lighting control (LLLC). When deployed in an EZ Connect application the sensor is designed for persistent lighting control as a standalone lighting control in case of a wireless network communication failure.
