#### **Specifications**

#### **GEM1C**

Maximum weight: 114 lb

#### BASE PLAN GEM CONCRETE SHAFT

**Top Cap:** Die-cast, low copper (< 0.6% Cu) aluminum secured to rib body by captive stainless steel allen cap screws. For lamp access, allen screws shall not require complete removal.

**Supports:** Die-cast, low copper (< 0.6% Cu) aluminum supports secured in place as a complete cage assembly. The top section provides a cutoff lamp compartment. The supports are secured to the shaft by four stainless steel tie rods.

**Refractor:** Thermally tempered soda lime glass sealed with silicone gaskets top and bottom.

**LED Optical System:** A total of 9 mid power LED emitters configured in a rectangular array comprised together as a module. Two (2) modules, 18 diodes for Type I version; three (3) modules, 27 diodes for Type III version; and four (4) modules, 36 diodes for Type V version. Available in 580nm Amber, 3000K, 4000K and 5000K color temperatures.

**LED Driver:** Universal voltage from 120 to 277V with a ±10% tolerance. -40°F. starting temperature. All drivers are Underwriters Laboratories recognized.

**Anchor Bolts:** Four  $C" \times 10" + 2"$  zinc plated J-bolts, each with two nuts, washers and a rigid pressed board template.

**Material:** Cement to conform to current specifications for Portland Cement. ASTM C150, Type I or II. Aggregates meet current requirements of Specifications for Concrete Aggregates, ASTM C33. Water to be clean and free from deleterious amounts of silt, oil, acids, alkalies or organic materials. Wire for reinforcement to conform to ASTM A185. Steel for lugs and plates to conform to ASTM A36, or A283 grade D.

**Surface:** Medium sand-blasted with anti-graffiti sealer. Available colors are Charcoal, Brown, Natural Gray or White, integral in concrete mix.

**Cure and Strength:** Allows for completion of the hydration process, and results in a 28 day compressive strength of not less than 4,500 psi.

**Manufacture:** Fiberglass molds used to insure uniform parts. Mold parting lines may be slightly visible in finished parts.

**Anchorage:** Four steel mounting tabs for installation on four  $K" \times 10" + 2"$  zinc electroplated J-bolts. Each anchor bolt is supplied with two nuts, two washers, and a rigid pressed board template.

**Shipment:** Palletized with adequate hold-downs to prevent load movement in transit.

**Finish:** Each luminaire receives a fade and abrasion resistant, electrostatically applied, thermally cured, triglycidal isocyanurate (TGIC) polyester powdercoat finish.

**Listed to:** UL 1598 Standard for Luminaires - UL 8750 Standard for Safety for Light Emitting Diode (LED) Equipment for use in Lighting Products and CSA C22.2#250.0 Luminaires. RoHS compliant. Meets Buy American provisions within ARRA.

**CAUTION:** Fixtures must be grounded in accordance with national, state and/or local electrical codes. Failure to do so may result in serious personal injury.

### **Standard Features**

Fixture	Cat. No. <b>GEM1C</b> Fixture with Concrete Shaft			
Electrical Module LED = Light Emitting Diode	Cat. Nos. for LED Electrical Modules available:         xL       xK       UV         Source:       Color Temperature:       Voltage:           18L= Type     27L= Type   II   27L= Type   III   36L= Type   V         36L= Type   V         4K = 4000K   15K = 5000K   120V-277V			
Finish TGIC thermoset polyester powder coat paint over a titanated zirconium conversion coating on fixture top cap. Concrete shaft surface color is integral in concrete mix. Available in any combination of paint and concrete finshes listed at right.	Top Cap Cat. No.: Color: Cat. No.: Color:    BLS			
0-10V Dimming Interface	Driver has a 0-10V dimming interface with a dimming range of 10-100%. Is compatible with most control systems including. Note: Not compatible with current sourcing dimmers. Controls compatible via Pink and Purple dimming lead.  Standard Input Black (+) White (-) Green (GND)  Pink Dimming Lead (-) Purple Dimming Lead (+)  Fixture Housing
