

NOTES:

1. Under normal conditions, the emergency load is controlled by the NX Room Controller.
2. During the loss of normal power, the emergency dimmed loads will raise to 100% dimmed output.
 - 2.1. Emergency loads will be un-controllable until normal power is restored.
 - 2.2. Normal loads will turn off until normal power is restored
3. When normal power is restored the dimmed level will be based on the Room Controller Power On settings.
